PROJECT CHARTER

Project Title	Documentation and Automation of the [e.g., "Monthly Sales Report"] Process.
Project Description	This project will map the current workflow, identify bottlenecks, and create a standardized, documented process, ultimately automating key steps to save time and reduce errors.
Project Purpose/Objective	To reduce the time spent on the [Specific Report/Task] by 50% by documenting the current process and building an automated template. This will ensure consistency, improve onboarding for new hires, and free up team capacity for higher-value work.
Scope Statement	Includes end-to-end process mapping of the current "as-is" state, identification of automation opportunities, creation of a detailed process document, and development of an automated template in Excel/Google Sheets.

Stakeholder List		
Name	**Organization**	**Role/ Responsibilities**
Project Sponsor:		Department Head (e.g., Sales Ops Manager): who **champions** the project and ensures team cooperation.
Project Manager:		(the team lead): **Maps** the process, **builds** the template, and **trains** the team.
Primary Users:		The team that currently executes the process (e.g., Sales Ops Associates): The team who **does** the work; they **test** the new tool and **use** it daily.
Subject Matter Experts:		A senior team member who knows the process intricately: The process expert who **explains** the current workflow and **validates** the new one.

Major Milestones & Timeline	
Description	Target Date
Interview SMEs & map "as-is" process	
Identify & validate improvement opportunities	
Develop "to-be" process & build automated template	
User Acceptance Testing (UAT), finalize documentation, and train the team	

Assumptions & Constraints	
Assumptions	Constraints
Subject Matter Experts will be available for interviews.	Automation must be achieved using existing company software (e.g., Microsoft Office/Google Workspace)
The existing process is stable enough to be documented.	No budget for new automation tools.

Approval & Sign-off		
Name/Role	Signature	Date

Project Scope & Resource Plan: Internal Process Documentation & Automation

- **Detailed Scope of Work:**
  - **Deliverables:** A detailed process document including a flowchart, a step-by-step Standard Operating Procedure (SOP), and a functional automated template (e.g., in Excel/Sheets).
  - **Process Steps:** Define the process goal and boundaries > Identify inputs and outputs > Map all process steps in a flowchart > Connect with stakeholders to assign responsibilities > Note exceptions > Test the new process and template.
- **Out-of-Scope Items:**
  - Changing the underlying business rules of the process.
  - Integrating the automated template with a dedicated database.
  - Documenting related but separate processes.
- **Resource Planning:**
  - **Human Resources:** You (Project Manager, 15 hrs/week), 1-2 Subject Matter Experts from the team (5 hrs total for interviews and review).
  - **Technical Resources:** Microsoft Visio/Lucidchart (for flowcharts) or PowerPoint/Google Slides; Microsoft Word/Google Docs (for SOP); Microsoft Excel/Google Sheets (for automation).
  - **Time Estimate:** Total project duration: 4 weeks. Total estimated effort: **50-60 hours**.
